

Stratos Private Cloud

for Microsoft
Dynamics ERP

A cloud ERP deployment may be among the best ways to lower upfront costs, reduce dependency on your internal IT department, reduce your total cost of ownership, and enable the flexibility and scalability to grow your organization efficiently. Velosio offers clients a new way to implement business management software solutions - Stratos Cloud Solutions.

With Stratos Cloud, you can access the same functionality of on-premise software solutions in a safe and secure private cloud hosted in one of our four SOC-2 compliant data centers. Stratos Private Cloud enables organizations to benefit from cloud scale, mobility, power and reliability with a small up-front investment and virtually no maintenance.

Stratos offers managed private cloud solutions built for your most complex demands and your toughest regulatory and security challenges. Stratos provides robust data protection, flexible customizations, integrations with other cloud and on-premise solutions, a guaranteed 99.99% uptime and full disaster protection.

Discover the benefits of ERP in the Stratos Private Cloud:

Reduced Costs

Gain budgeting and planning accuracy with predictable monthly payments. Significantly reduce IT and capital investments/expenses and divert capital and energy to other important areas in your business.

Rapid Deployment

Deploy your ERP quickly and for less. Deploying in the private cloud delivers rapid provisioning of infrastructure resources for new applications, speeding up rollout.

Enhanced Security

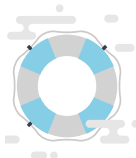

Stratos private cloud deployments offer robust security, the safety of data redundancy, and passes stringent security tests.

Easier Compliance

Stratos private cloud meets SSAE16, SOC1 (SAS70), SOC2, SOC3, SOX, HIPAA, PCI, ITAR, FIPS-140-2 and Safe Harbor compliance regulations.

Disaster recovery

Full redundancy, failover and a choice of four aggressive recovery time operative (RTO) and recover point operatives (RPO) comes built-in with Stratos Private Cloud.

Customizations & Integrations

Tailor your application and deployment model, control your updates and successfully integrate with other on-premise or public cloud solutions. Stratos offers tailored, end-to-end industry customizations to fit your unique business needs.

Industry-leading reliability

Stratos cloud delivers maximum performance that flex as your demands increase. Our 99.99% guaranteed uptime with multiple redundant data centers that meet ISO and LEED requirements ensures the highest levels of availability and security.

Support

Unburden your IT resources with a cloud delivery model that provides automatic upgrades and updates. We perform the administration and application maintenance so your IT department can focus on more strategic initiatives.

Mobility

With seamless Microsoft Dynamics and Office 365 integrations, Stratos Cloud enables you to centralize your information and access it from anywhere in the world, on any computer or mobile device, at any time.

Velosio is a new leader in cloud, that simplifies *your* journey to NEXT.
