

Move to Modern:

Thrive in the Digital Age with Dynamics in the Cloud

Establish the flexible, secure foundation to build for the digital future by moving your on-prem financial management system—Microsoft Dynamics GP, NAV or SL—to Microsoft's Azure cloud. Hosting Dynamics on Azure sets your business up to deliver modern workplace experiences, capitalize on the power of data and take full advantage of emerging technology.

Managed services provides critical technology support

Cybersecurity managed by professionals

Business continuity in the face of disaster

- Continuous, automated backup
- Redundant systems
- Geo-replication

Protect corporate assets everywhere

- Encrypt employee data on mobile devices
- Wipe lost or stolen devices
- Provide access to files via cloud

Modernize business processes with Azure services

Simplify work with automated flow of processes and information across the organization

- Increase efficiency and productivity
- Improve customer satisfaction
- Standardize service delivery across locations

Microsoft Power BI, Flow and PowerApps connect data and processes to automate time-consuming tasks, drive approvals and alert stakeholders

Support the modern workplace, delivering information wherever and whenever it's needed

Leverage data to optimize operations and build competitive edge

Put business analytics in the hands of the people who need it

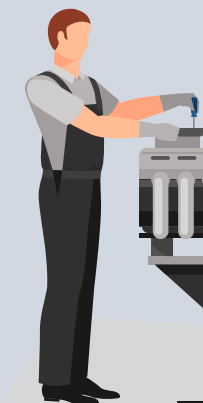

- Adjust staffing to meet projected demand
- Reduce inventory costs with accurate forecasts
- Identify outstanding and under-performing business units

Use machine learning to forecast the future and optimize resources

- Estimate product demand
- Predict sales figures
- Determine equipment service priorities

Use IoT (Internet of Things) to monitor devices and equipment

- Detect, troubleshoot and resolve issues proactively
- Dispatch technicians with knowledge and parts to resolve issues on the first call
- Improve product design based on equipment performance data

Move to the cloud with confidence

When you make the decision to host your Dynamics GP, SL or NAV in the cloud, you need a partner with the experience to ensure a smooth transition.

Velosio, the new leader in cloud, will simplify your move to modern. We guide you, deploying best-fit business applications to keep you ahead of the competition in today's digital-first business environment.

Microsoft Azure is the powerful, flexible cloud platform that will enable your organization to extend your infrastructure, build and deploy apps, manage data and storage, and unlock powerful business insights.

Contact us to set up a **Cloud Assessment** for your organization. Through a **Cloud Planning Workshop**, we will develop a **Migration Plan and Business Case** to guide your digital journey.
