

Automated Traceability for Compliance and Audit-readiness

There is a major shift happening today in the automation of growing, packing and shipping of fruits and vegetables. More and more farms are looking for automated traceability and business analytics that show a detailed description of where produce has been shipped and where it came from—critically important for compliance and recall management.

To growers, packers and shippers of Fresh Fruit and Vegetables, Velosio FRESH is the supply chain solution that digitizes and modernizes production and distribution from field to fork. Through automated transactions, data cleanliness and operational transparency, Velosio FRESH prepares you for audit or compliance checks.

Velosio FRESH connects, captures and delivers all your business management data in real time from one end of the supply chain to the other.

With the combined power of Microsoft Dynamics 365 and LINKFRESH, fresh food distributors are equipped with audit-ready data to remain compliant with legislation and standards thanks to traceability. Velosio FRESH ensures food safety and quality assurance with real-time data capture and retrieval. °

 Microsoft | Dynamics 365

Velosio FRESH key functions include:

- Operations, production planning and performance
- Pricing, forecasting and planning
- End-to-end pallet traceability
- Advanced mobile warehousing
- Packing and transportation management
- EDI
- Advanced quality management
- Consignment management and third-party services
- Analytics and insights
- Access and update information from mobile devices anywhere and at any time

Real-time production, operations, and supply chain data gives you full visibility and traceability of all stock movements

SUPPLY CHAIN

- Manage product through utilization of produce dimensions for different produce types and dimension groups such as: produce variety, grade, brand/mark, size, color, origin, distribution, packaging specification, box configuration, depot date and more.
- Data structures to support the management of grower records, including sites, areas, fields and supplier data integration.
- Capture delivery data, reported between sales shipment and invoice with Proof of Delivery
- Real-time production, operations, and supply chain data gives you full visibility and traceability of all stock movements.

CONSIGNMENTS

- Complete end-to-end traceability of all inventory and financial transactions that occurred with relation to a consignment of received goods; regardless of mixing in production, returns and rework.

OPERATIONS

- Shop floor data collection via touch screens for current and live production throughput including the ability to record line status, staffing levels, consumption, output, downtime and more.

“The deployment of the LINKFRESH ERP solution was part of an ongoing business wide initiative to establish common practices, standards and systems throughout the Group. We are transparent now and can make better business decisions based on better data, and we have full traceability now too.”

Ricardo Crisantes
Vice President, Wholesum Harvest

- Full integration to grower returns for pay back based on grading or production output.

ADVANCED TRANSPORTATION MANAGEMENT

- Ability to track requirements for transport including food-specific logistics units such as pallets, dollies, dolavs, and more.

The Velosio Difference

Our Adaptable Implementation Methodology and industry expertise makes us uniquely positioned to bring the cloud-based functionality of Microsoft Dynamics 365 for Operations + LINKFRESH to Fresh Food Producers and distributors with an affordable price-point and timely execution.
