## Progressus Software
## Project Cost Tracking

| | |
|---|---|
| **Gain Control Over Project Costs** | Track, view, and analyze costs and revenues for individual projects that are still in progress. Margins can be predicted and controlled and future expenses easily viewed without waiting until the end of an accounting period. |
| **Monitor Project Status** | Predefined stop lighting and customizable stop lighting helps monitor what is important to your company. |
| **Enhance Project Collaboration** | Provide accountants and project managers with a single system that enables them to use the same set of data for better analysis and project accountability. Project data can then be presented in terms that are easy for project managers to understand and use. |
| **Improve Project Productivity** | Take advantage of flexible project structures, billing rates, and more to make your project run efficient and effective. Costs are collected and charged to individual projects within a single integrated solution. |
| **Instant Expense Visibility** | Take known or expected expenses into account in Progressus. Record expenses such as subcontractors, purchasing, and labor charges as commitments as soon as they are entered—even before the end of an accounting period—to allow for the future cost. |
| **Resource Costs** | Progressus provides distinct cost matrices for resources, resource groups and project specific costing. Working across activities, work types or date spans makes this a scalable feature. |
| **Flexible Invoicing Control** | Assign various billing methods, rate structures and mark-up rules for each project or for a specific invoice and then generate invoices on demand. |
| **Shorten Billing Cycles** | Shorten billing cycles and improve cash flow by taking control of unbilled receivables and converting them more quickly to revenues.<br><br>Streamline invoicing with invoice generation, formatting, and submission of Invoice Suggestions; then easily note needed corrections, approve invoices, and post receivables. |
