Velosio[®]

Velosio moves you from what is to what is next for your business through expert delivery of business solutions and cloud technologies. With over 30 years of business systems experience, Velosio leverages expertise across Microsoft's entire solution portfolio including Dynamics, Office 365, Azure and Power Platform, as well as Oracle Netsuite. A key piece of

Velosio's value is delivering fresh ideas across ERP, CRM, business intelligence and cloud business solution requirements helping our clients optimize their business operations.

Our mission is to enable clients to realize business value faster, simplify the process of deploying technology, acquire deeper data-driven insights, and explore ongoing innovation to drive business forward. Beyond our expertise, as a Velosio client you can leverage the Velosio network of peers, external resources, and community events to help you on your journey to what's next powering your business growth.

NETSUITE**

Cloud

Cloud technology has opened new avenues for companies of all sizes to expand capabilities, power today's mobile workforce, and create greater efficiency increasing productivity. Companies deploying cloud technologies benefit from improved reliability, security, and scalability, as well as innovating with new business services. Both your operations and your customers can benefit by creating new end-to-end business processes, customer-facing applications, and analytics powered by cloud-based machine learning.

For client's with on-premise server infrastructure, Velosio can help achieve improved efficiency and reliability by helping you transition to the cloud. Velosio's experienced team can help clients deliver on all these opportunities, enabling you to meet customer demands.

Services

Clients often tell us that today's technology choices can be overwhelming and complicated. Cloud technologies are accelerating the pace at which new capabilities come to market, further compounding decision making. Velosio simplifies the process. We do this through plain-language conversations, a focus on delivering best practice, and multiple options for engaging with your team is how we deliver on business value faster.

Velosio brings innovation to service delivery by streamlining choices that include the most common use-case scenarios at predictable fees for clients who desire the best time to value. For more complex needs, we provide a more traditional solution development approach. Velosio has choices for how you implement the latest technology solutions.

What characterizes our work?

Accountability, integrity, teamwork and commitment guide our interactions with clients. From discovery sessions through configuration, implementation, and ongoing support of business applications, we are focused on bottom line growth for clients.

As our clients' businesses grow, technology continues to change – our “what’s next” assessments marry both vectors of change, ensuring clients have a plan to optimize their environments. Velosio’s Client Care plans offer the support (and assurance at the level your business requires) for those unplanned occurrences where more is needed.

THE VELOSIO CLIENT SERVICE EXPERIENCE

Simplify your journey:
We offer clients plain language, plenty of options and total transparency. Our clients get guidance to simplify their journey, not complicate it.

Fresh ideas and innovation:
Our clients get new thinking from people who understand their business vision and the role technology can play in it.

Realize business value faster:
Our clients get business value in every interaction, completing projects on time and budget.

Gain insight:
When clients join Velosio, they become part of an ecosystem, interacting with peers and some of the most experienced industry and technology experts.

Velosio Strength

30

plus years,

300

plus team members in North
America and India,

4,000

plus clients and local presence
across the United States.

We deliver business solutions for small and medium-sized businesses, and larger enterprises. We provide deep industry expertise for Professional Services firms, Greenhouse Growers, Fresh Food Producers, and Heavy Equipment and Truck Dealers.

We have solutions for larger enterprises requiring core financials to power their hub-and-spoke model, back-office financial management with integration to industry specific solutions, or legacy solution replacement with powerful financial management delivered with streamlined, rapid implementation. These solutions reduce risk, investment and total cost of ownership.

Velosio's years of experience with business applications translate to a deep bench of tenured team members with competency across ERP, CRM, and Cloud. We have earned recognition by Microsoft as a Top 1% performing partner worldwide and a position as an emerging NetSuite leader. We have strategic ISV partnerships, and a portfolio of solution and service offerings you won't find anywhere else.

Velosio Vision

We empower clients to go from what is to what is possible through innovative technology, specialized expertise and strategic partnerships. Let Velosio help your business on its journey to next.

What's your next?

“Velosio helped us recover from a near disaster CRM/ERP project that we started with a different partner. Their breadth and depth of consultants delivered a very complex redesign project on-time and on-budget. This has been breath of fresh air for our company and we are now able to focus on running our business instead of fighting our software.”
